

Riders name their price. Drivers bid.

A complete bid-based ride-hailing and parcel delivery platform — real-time tracking, wallets, surge pricing and a full admin dashboard, ready to launch under your brand.

Rides

+ parcel delivery

Bidding

custom fares, live offers

Wallet

loyalty, bonuses, payouts

Control

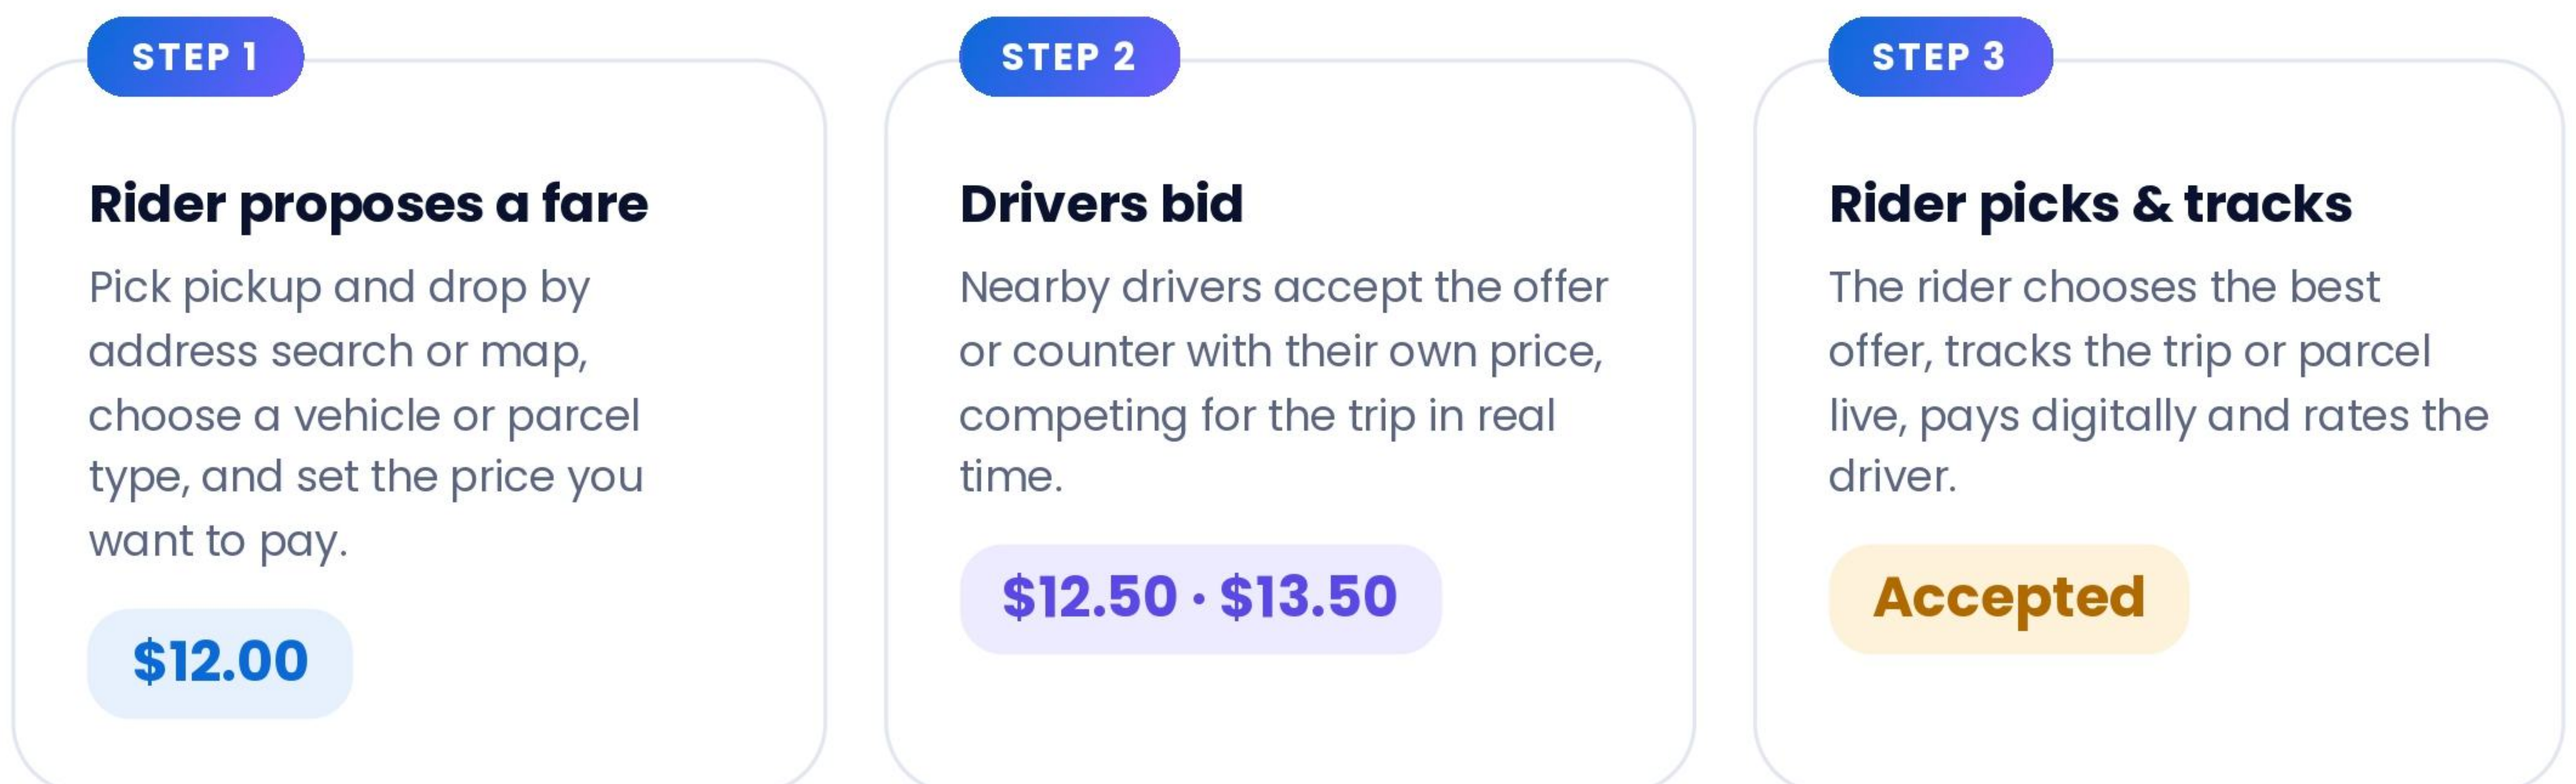

zones, fares, analytics

01 • THE PLATFORM

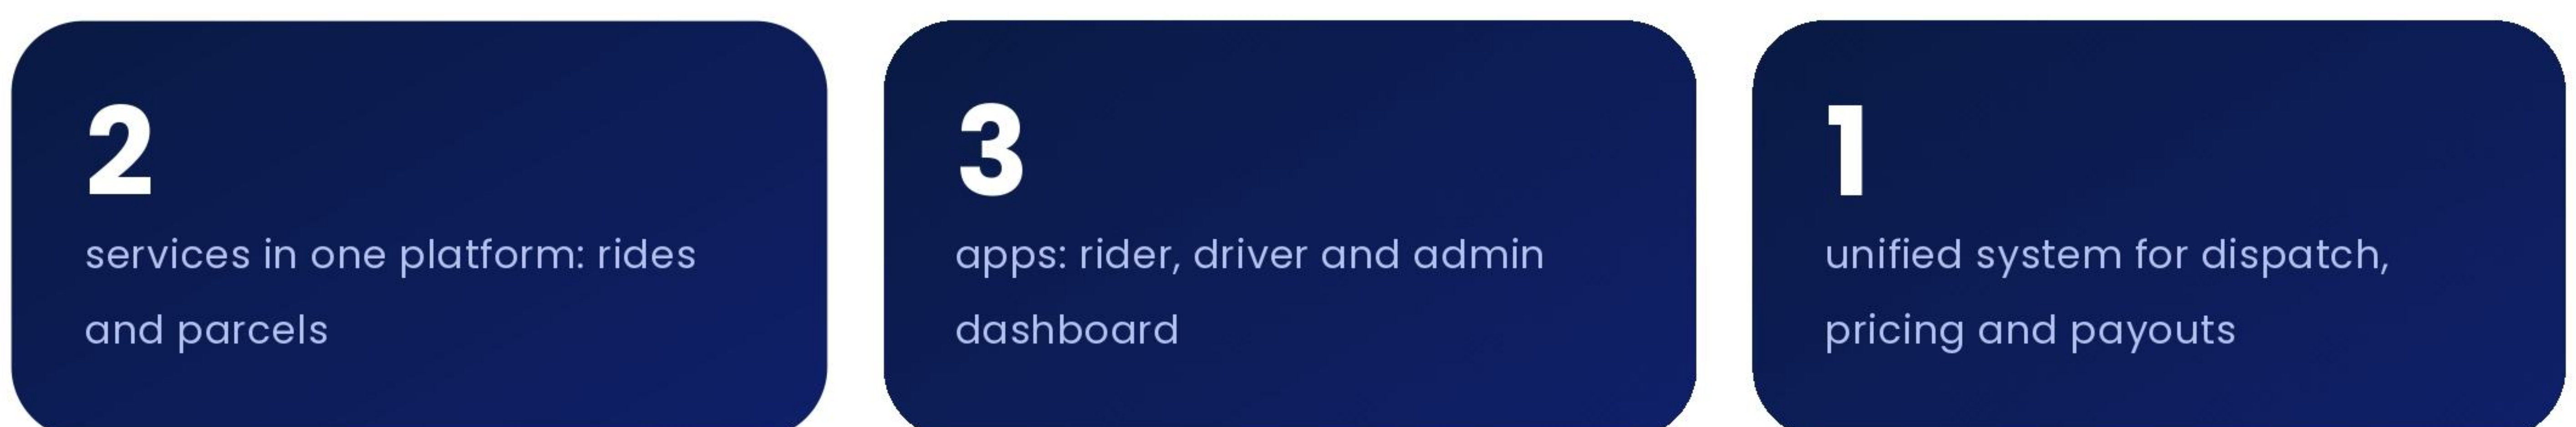

Fixed fares are old news. Let price be a conversation.

Riders propose the fare they want to pay and nearby drivers accept or counter with their own offer. Everyone sees a transparent price before the trip starts, and drivers keep control of their earnings. This platform gives you that fare-negotiation model — for rides *and* parcels — as a complete, launch-ready system.

HOW A TRIP WORKS

Amounts shown are illustrative.

WHY FOUNDERS CHOOSE IT

- ✓ **Bidding built in.** Custom fares and competing driver offers, not an add-on.
- ✓ **Rides + parcels.** Run both services side by side from one platform.
- ✓ **Professional mobile apps.** Flutter rider and driver apps for iOS and Android.
- ✓ **Global ready.** Multiple currencies and languages out of the box.
- ✓ **Full operational control.** Zones, fares, commissions, surge and payouts from one dashboard.

BUILT FOR

- ◆ Entrepreneurs & startups
- ◆ Developers & agencies (white-label)
- ◆ Logistics & courier businesses
- ◆ Gig-economy platforms

BUILT WITH

- Flutter
- Laravel 11
- WebSockets
- Firebase

02 · RIDER & DRIVER APPS

Two apps. One seamless marketplace.

Polished Flutter apps for both sides of the trip, in sync through real-time WebSockets and live GPS.

Rider app

IOS · ANDROID

Book your way

Search an address, pick on the map, or use voice search.

Propose your fare

Choose a vehicle or parcel type and name your price.

Advance booking

Schedule trips ahead with notifications before pickup.

Live tracking

Follow the driver or parcel in real time.

Flexible payments

Multiple digital gateways and instant wallet top-ups.

Rewards & ratings

Earn loyalty points and levels, redeem wallet balance, rate every trip.

Driver app

IOS · ANDROID

Accept, reject or bid

Compete on price for the trips you want.

Multi-ride & multi-parcel

Accept upcoming trips near drop-off, plus multiple scheduled rides.

Earnings dashboard

Track earnings, trip history and performance statistics.

Wallet & payouts

Manage balance, bonuses and settle dues digitally.

Verified onboarding

Upload driver and vehicle documents for admin approval.

Smart alerts

Out-of-zone notifications and admin-driver chat support.

Parcel delivery, built in

The same bidding model, applied to couriers.

Parcel limits

Weight and size restrictions with rider warnings

Multi-parcel

Drivers can accept several parcels

Refunds

Policies, validity and reasons configured by admin

Return fee

Admin decides if riders pay when a driver cancels

OYELABS · RIDE-HAILING & DELIVERY PLATFORM

03

03 · PRICING · PAYMENTS · SAFETY

Smart pricing. Safe money.

Tools to protect your margins, keep cash flowing and make every trip feel safe.

SURGE PRICING

Daily · Weekly · Monthly

Schedule dynamic rates

Create, edit and schedule surge rates by time and zone. Integrity checks prevent overlapping zones and conflicting time slots.

FARE CONTROLS

- ✓ Zones, base fares and distance charges
- ✓ Driver commissions
- ✓ Extra fare fee for weather or surge events
- ✓ Coupons, discounts and offers
- ✓ Multiple currencies

Wallet & payments

Riders top up wallets with secure digital payments, and admins run bonus campaigns on top-ups. Drivers settle dues digitally.

Cash-in-hand limit

Set a limit on the cash drivers hold. Drivers get system warnings and restrictions when outstanding balances build up.

Referrals, loyalty & payouts

Configure payout rules, driver bonuses, referral rewards, loyalty points and levels to grow supply and demand.

Refund management

Set refund policies, validity windows and reasons so disputes are handled consistently.

SAFETY & TRUST

Panic alerts

One-tap safety alerts notify admins in real time.

Emergency contacts

Riders and drivers set trusted contacts.

Trip OTP

Start trips with OTP, configurable by admin.

Verified drivers

Documents and vehicles approved before going live.

04 • ADMIN DASHBOARD

Run every trip, driver and payout from one place.

A Laravel-powered dashboard with live operations views, analytics and the controls to shape how your marketplace runs.

Live analytics

Real-time analytics, reporting and trip summaries across your business.

Fleet view

Live driver tracking with zone filters and response to driver alerts.

Heatmap & clustering

Visualize trip density and popular routes to plan supply.

Users & drivers

Manage and monitor users, trips and transactions. Approve drivers and vehicles.

Zones & fares

Define zones, fares, distance charges and driver commissions.

Promotions

Coupons, discounts, offers, loyalty programs and referrals.

Push notifications

Promotional and scheduled notifications, with translated messages.

Currency & language

Enable multiple currencies and payment options; manage translations.

Parcel controls

Set parcel limits, weight rules, refunds and return-fee policy.

Real-time by design

WebSocket integration keeps riders, drivers and the dashboard in instant sync, backed by live GPS tracking.

Global by default

Multi-currency and multi-language support, with an architecture optimized for multi-region deployment.

INTEGRATIONS

Google Maps

Real-time GPS

Payment gateways

SMS gateways

Firebase notifications & OTP

reCAPTCHA v3

WebSockets

05 · WHAT YOU GET

Complete platform. **Ready to launch.**

Rider app

Flutter app for iOS and Android with booking, bidding, tracking, wallet and rewards.

Driver app

Flutter app for iOS and Android with bidding, earnings, payouts and document onboarding.

Admin dashboard

Laravel 11 backend and dashboard for zones, pricing, users, payouts and analytics.

Launch support

Rebranding, server and store deployment, video training and 30 days of tech support.

LAUNCH SERVICES

- ✓ Rebranding with your logo and color scheme
- ✓ Deployment to your server and the app stores
- ✓ Video tutorials for your team
- ✓ 30 days of complimentary tech support

TECHNICAL SNAPSHOT

- ✓ Flutter apps (iOS and Android)
- ✓ Laravel 11 on PHP 8.2+
- ✓ WebSockets and real-time GPS
- ✓ Firebase notifications and OTP

NEXT STEP

See it running. Then make it yours.

Book a personalized walkthrough and we'll show you the rider app, driver app and admin dashboard, plus a launch plan for your market.
