RIDE HAILING · PARCEL DELIVERY · FARE BIDDING

UBER CLONE

Launch a ride & delivery platform where riders name their price.

One unified system: a rider app, a driver app and a powerful admin dashboard. Built to launch and scale an on-demand mobility and logistics business.

Fare bidding

Custom offers from riders and drivers

Rides + Parcels

Dual-mode on a single platform

Global-ready

Multi-currency, multi-language

iOS & Android

Flutter apps for riders and drivers

THE PLATFORM

A complete business-in-a-box for on-demand mobility.

Designed for entrepreneurs, startups and developers who want to launch or manage a transportation and logistics business. Dispatching, bidding, payments, wallets and analytics all live under one system.

Flexible bidding system

Drivers offer custom fares, creating a competitive marketplace where customers pick the price that suits them.

Dual-mode operations

Run ride hailing and parcel delivery at the same time from a single platform, with shared users, drivers and wallets.

Global readiness

Multiple currencies and languages let you open new markets without rebuilding the product.

Complete admin control

Configure pricing, manage users, control zones, approve drivers and track performance from an intuitive dashboard.

HOW BIDDING WORKS

1

Request

Rider picks a pickup and drop-off by search or map, and chooses a vehicle or parcel type

2

Propose a fare

Rider sets the price they are willing to pay for the trip

3

Drivers bid

Nearby drivers accept, reject or counter with their own fare

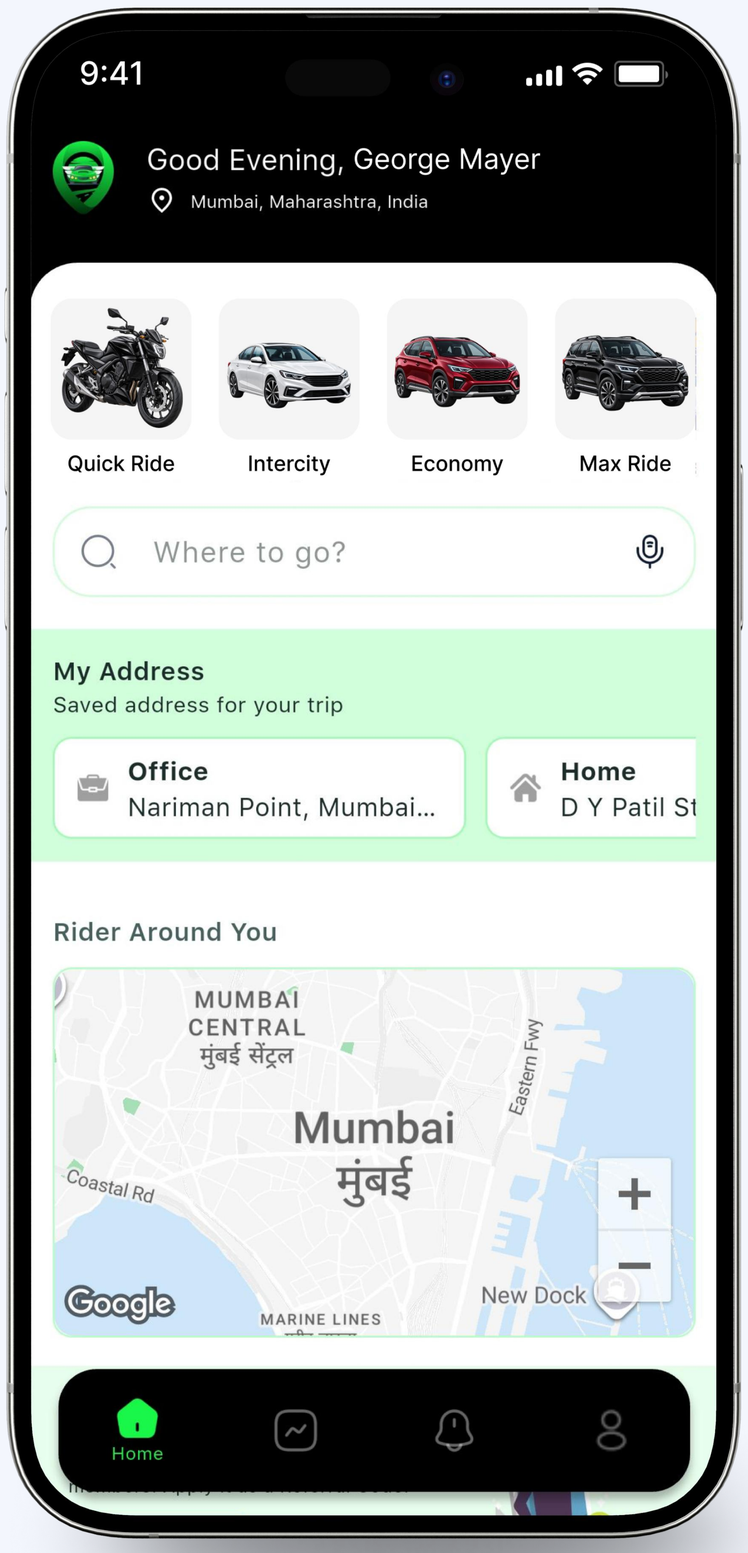

4

Ride & track

Rider chooses an offer, then follows the trip live to completion

A fairer model for riders and drivers

Transparent pricing lets riders control cost while drivers compete for better earning opportunities, a model that empowers gig-economy platforms.

RIDER APP

Everything riders need, in a few taps.

Request by search or map
Book rides or send parcels with address search or map selection.

Choose vehicle & propose a fare
Pick a vehicle or parcel type and offer a custom price.

Real-time tracking
Follow trips and parcels live from request to drop-off.

Secure digital payments
Pay through multiple payment gateways, or from wallet balance.

Loyalty points & wallet
Earn and redeem points, and top up the wallet instantly.

Rate & review
Rate drivers and delivery partners after each trip.

DRIVER & DELIVERY PARTNER APP

Built to help drivers earn more.

Accept, reject or bid
Respond to ride and parcel requests with a price of their own.

Compete for earnings
Win better-paying trips through a transparent bidding model.

Earnings & stats
Trip history, performance and earnings in one place.

Wallet & payouts
Manage wallet, payouts and loyalty bonuses.

Documents & vehicles
Register and update documents, with admin approval.

Multiple trips
Accept several scheduled rides, or multiple parcels at once.

Advance booking
Schedule trips ahead of time

OTP login
Quick, secure sign-in

Language selection
Chosen on first launch

Smart notifications
Trip and offer alerts

ADMIN PANEL

Run the whole operation from one dashboard.

Manage and monitor every user, trip and transaction. Set the rules of your marketplace, and see what is happening in real time.

Users, trips & payments

Monitor all users, trips and transactions in one place.

Zones, fares & commissions

Define zones, base fares, distance charges and driver commission.

Surge pricing

Create, edit and schedule surge on daily, weekly or monthly intervals.

Live fleet view

Track drivers in real time, with a zone filter and alert responses.

Heatmap & clustering

Visualise trip density and popular routes to plan supply.

Driver & vehicle approval

Review documents and approve new drivers and vehicles.

Refund management

Set refund policies, validity windows and reasons.

Payouts, bonuses, referrals

Configure driver payout rules, bonuses and referral rewards.

Analytics & reports

Real-time analytics, reports and trip summaries.

GROW & PROTECT

Tools to earn, retain and keep everyone safe.

Monetise

Flexible revenue levers

Surge pricing
Scheduled, with overlap checks

Extra fare fee
Charge more in weather or surge events

Commission & charges
Per-zone fares and driver commission

Cash-in-hand limit
Cap outstanding driver balances

Retain

Keep riders coming back

Wallet top-up & bonus
Instant digital top-ups, bonus campaigns

Loyalty & levels
Points riders earn and redeem

Referral system
Reward users for bringing others

Coupons & offers
Discounts, promos and push campaigns

Protect

Trust built in

Panic alerts
SOS with emergency contacts, live to admin

Configurable OTP
Admin can toggle OTP for trip start

reCAPTCHA v3
Defence against automated abuse

Admin–driver chat
Predefined Q&A library for quick support

BUILT IN

Parcel delivery, not an afterthought

- Parcel type & weight limits
- Weight & restriction warnings
- Live parcel tracking
- Multi-parcel acceptance
- Admin-controlled return fee
- Parcel refunds & tracking

Trip scheduling
Advance booking with notifications

Push campaigns
Promotional and scheduled alerts

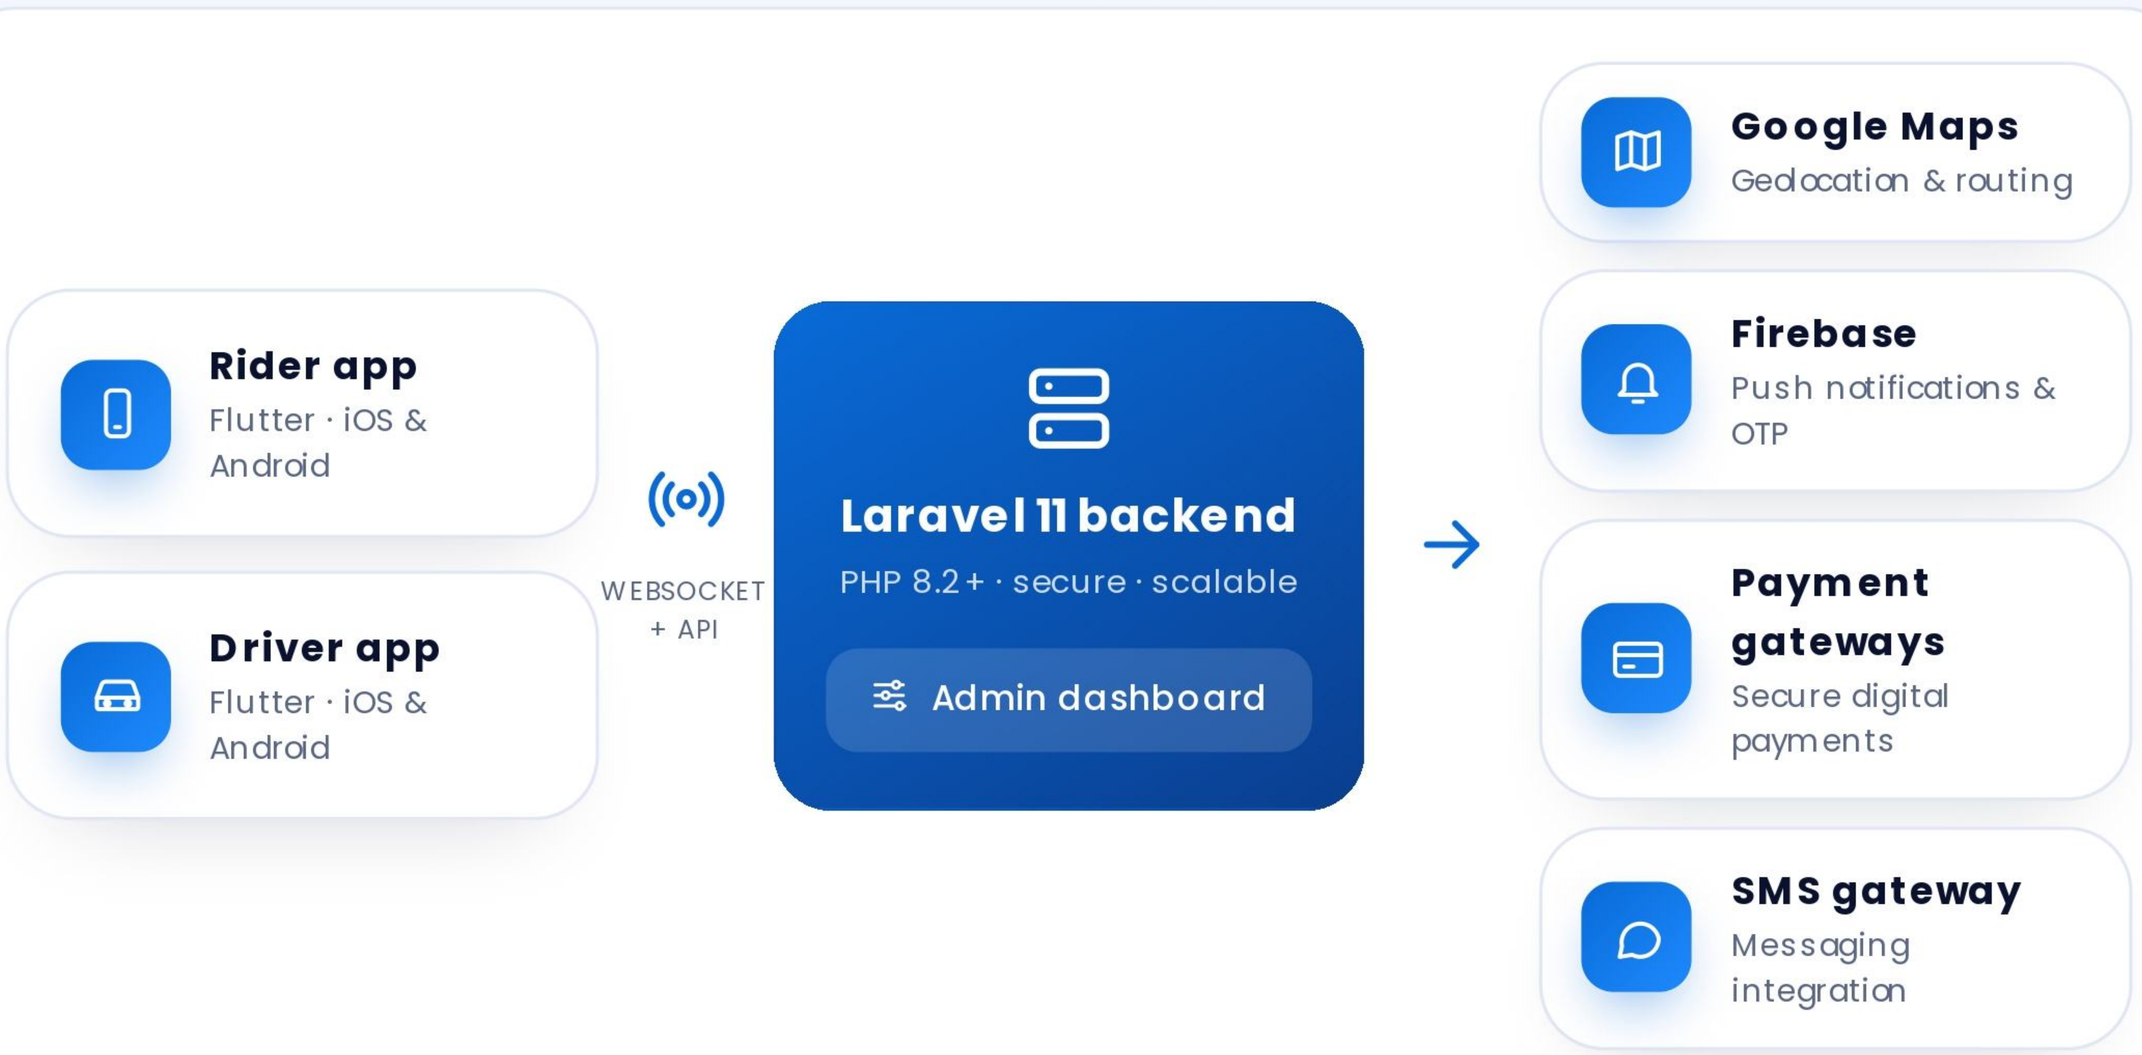

Translation engine
Localised messages & notifications

Voice search
Faster destination entry

TECHNOLOGY

Modern, real-time and built to scale.

Cross-platform Flutter apps talk to a Laravel backend over WebSockets, so bids, locations and status updates sync instantly.

Specifications

Platform version	**3.7**
Backend	**Laravel 11 · PHP 8.2+**
Mobile apps	**Flutter · iOS & Android**
Real-time sync	**WebSocket**
Deployment	**Multi-region optimised**

What you get

- Rider app for iOS & Android
- Driver app for iOS & Android
- Admin dashboard
- Landing website
- Customisable & white-label ready

Shipping continuously
